PROFILE

UX/UI Designer with four years designing web and mobile interfaces for projects across nine markets in Latin America and Europe. I work from the problem: research, information architecture, flows and wireframes first, then high-fidelity interfaces in Figma with reusable components and libraries. I write front-end in HTML, CSS and JavaScript, which means I design knowing what is feasible and I notice the gap between what was designed and what actually shipped. AI is part of my process, not an intention: I use Claude and Claude Code for research synthesis, documentation and code prototyping, with Figma connected through MCP.

CAPABILITIES

- User research: qualitative interviews, competitive analysis and traceable synthesis
- Personas, journey maps, problem definition and navigation flows
- Information architecture, wireframing and prototyping in Figma
- High-fidelity interfaces, with attention to visual hierarchy, typography and spacing
- Design systems: components, variants, variables, tokens and libraries
- Responsive layouts for web and mobile
- Handoff and support during implementation with development teams
- Design Thinking, Human-Centred Design, Lean UX, Agile and Scrum

AI IN MY DESIGN WORKFLOW

- Claude and Claude Code for research synthesis, UX writing, generating variations and documentation
- Figma connected through MCP, with assisted generation from design files
- Figma Make for fast interface exploration
- AI-assisted code prototyping: I designed and shipped my own portfolio in React this way
- Explicit AI methodology statements in my case studies, separating real evidence from generated material

PROJECTS

Full case studies at fidesign.vercel.app.

- **Copiloto Financeiro, product discovery.** A financial support product for people with variable income. I structured research in layers with different decision weights: four qualitative interviews, an autoethnography with my own bias declared upfront and a structured competitive analysis as the core evidence, with exploratory personas used only to stress-test hypotheses. Synthesised into an affinity diagram where every data point is tagged by origin, followed by personas, journey map and problem statement, so that each decision can be traced back to evidence. AI use is declared step by step.
- **Ultrafarma Redesign, e-commerce app home screen.** Diagnosis before solution, on a product already in use. I recorded and documented the functional errors in the live home screen, rebuilt the content hierarchy around what users need first, and designed the new interface with a style guide derived from the existing brand.
- **Lacrei Saúde, inclusive healthcare platform.** End-to-end UX/UI for a web platform: research, personas, journey map, information architecture, wireframes and high-fidelity prototype in Figma.
- **Guia de Motéis GO, landing page redesign.** Conversion-driven UI to increase app downloads. Crazy 8s, wireframes and responsive prototype.
- **fidesign.vercel.app, personal portfolio.** Designed and built by me, with my own design system of tokens and components, in React, Vite, TypeScript and Tailwind, using Claude Code. Deployed on Vercel.

EXPERIENCE

UX/UI Designer | AddSales, digital marketing agency operating across Latin America and Europe Aug 2022 to present

- Design responsive interfaces and pages in Figma from briefs and initial structure provided by the business team, for nine markets: Brazil, Colombia, Argentina, Ecuador, Chile, Uruguay, Spain, Mexico and Portugal.
- Define structure, hierarchy and user path for each interface before moving into visual design.
- Build and maintain reusable Figma component libraries with auto layout and variables, keeping consistency across screens and projects.
- Implement the front-end in HTML, CSS, Bootstrap and JavaScript, collaborating with development teams during implementation.

- Adjust interfaces based on project requirements and feedback received through the business team.

UX/UI Design Intern | TT&T IT Solutions

May 2024 to Oct 2024

- Applied Lean UX across the design cycle of a digital product, within a multidisciplinary team.
- Quantitative user research through surveys, used to build personas and journey maps supporting information architecture decisions.
- Wireframes and navigation flows in Figma.

EARLIER EXPERIENCE

- Layout Designer, Click Traduções, Jun 2021 to Apr 2024, across two contracts. Formatting and layout of translated documents for international clients.
- Graphic Designer, Nith Treinamentos, Jan 2022 to Jun 2022. Graphic materials, ebooks and visual assets for educational content.

EDUCATION

MA in Product and Service Design | University of Minho, School of Architecture, Art and Design, Portugal

Starting Sep 2026

Ranked 1st in the international admissions category for the 2026 intake.

Technologist Degree in Graphic Design | Universidade Anhanguera-Uniderp, Brazil

May 2022 to Jun 2025

Higher education degree in design, 1,700 hours, GPA 9.57 out of 10 (equivalent to 19.14 out of 20). Recognised by the Brazilian Ministry of Education, Ordinance 696/2024.

CERTIFICATIONS

- UX Designer Bootcamp, IGTI, 2021, 148 hours
- Complete Interface Design Course, Udemy, 2022, 20.5 hours
- UX & Design Thinking, Udemy, 2021, 11.5 hours
- SFPC Scrum Foundation Professional Certification, CertiProf, 2024, exam-based
- Front End Track, Ada Tech, 2024, 19 hours

SKILLS

Design: Figma (auto layout, components, variants, variables, libraries, design tokens, prototyping, handoff), design systems, FigJam, Adobe Creative Suite

UX: User research, interviews, competitive analysis, affinity diagrams, personas, journey maps, information architecture, flows, wireframing, prototyping

AI: Claude, Claude Code, Figma MCP, Figma Make, ChatGPT, Gemini, Cursor

Front-end: HTML, CSS, Bootstrap, JavaScript, Git, VS Code. React, TypeScript and Tailwind with AI assistance

LANGUAGES

Portuguese: Native

English: Reading B1. Speaking and writing A2, actively improving.
